

Assignments delivery instructions

Please prepare a ZIP file called `Delivery.zip`, and copy in a single folder all the files as shown in the table below. Please: in order to save space, copy only the required files not anything else. Note that the file `Mesh . hpp`, which includes the solution for both assignments A05 and A09, should be renamed respectively to `Mesh5 . hpp` and `Mesh9 . hpp` . Also note that for assignment A06, only the screenshot and no source code should be delivered.

Fill following form, to emphasize the assignments you done. In that form you have also the opportunity of adding some comments, if needed (and only if needed). Use that space to give the motivations for which you have not done a given assignment if not delivered.

https://forms.office.com/Pages/ResponsePage.aspx?id=K3EXCvNtXUKAjjCd8ope67-7CBR7gDJEgHF_krAEqPhURES3WkFRV0VKVUROTjI3VzE1NFIPtZvTRi4u

Compress then all the files in a single ZIP file. Please, try to use .ZIP, and not .RAR, .7Z, .TGZ, or other compression standards. The final delivery should be a single file, less than 10MB (in my case, it was around 6MB).

An automatic procedure will pass through your folder, copy your solutions and paste them with the rest of the files which were included in the assignment, compile the project, run it, and take some extra screen shots. So please, try to follow the proposed naming convention, to avoid problems during this automated process.

figure.hpp	Assignment 01
